# WHEAT FIBER

## ECO FRIENDLY MATERIAL

### Che cos'è esattamente?

La paglia di grano è lo stelo rimasto dopo la raccolta dei chicchi di grano. Tradizionalmente, è stato trattato come uno spreco. In alcuni paesi, gli agricoltori lo bruciano, contribuendo all'inquinamento atmosferico e creando un pericolo per la salute pubblica. Tuttavia, questi gambi hanno ancora valore. Recuperiamo questo materiale e lo utilizziamo per realizzare i nostri prodotti in paglia di grano.

### What exactly is it?

Wheat straw is the stalk left over after wheat grains are harvested. Traditionally, it has been treated as a waste. In some countries, farmers burn it, contributing to air pollution and creating a public health hazard. However, these stalks still have value. We recover this material and use it to make our wheat straw products.

### Perché lo usiamo?

Come sappiamo le foreste sono minacciate di estinzione in tutto il mondo, quindi è importante per noi trovare materiali alternativi che non richiedono risorse forestali. Con la fibra di grano, è ancora possibile utilizzare prodotti di "carta" usa e getta ad alte prestazioni, scegliendo un prodotto che è fatto di fibra di grano rapidamente rinnovabile e rigenerata anziché alberi. Ciò che è ancora più rilevante è che alla fine della sua vita, puoi inviare la tua conchiglia alla struttura di compostaggio commerciale anziché a una discarica.

### Why do we use it?

As we know forests are threatened and endangered around the world, so it is important for us to find alternative materials that do not require virgin forest resources. With wheat fiber, you can still use high performing disposable "paper" products, choosing a product that is made from rapidly renewable and reclaimed wheat fiber instead of trees. What's even better is that at the end of its life, you can send your clamshell to the commercial composting facility instead of a landfill.

# SEAQUAL

What is the SEAQUAL initiative? It is an initiative that seeks to challenge the plastic pollution of our oceans by cleaning up marine litter and promoting an increasingly sustainable society.

SEAQUAL fabrics are made with polyester yarns from recycled materials from the sea, thus helping to preserve natural resources and keep the oceans clean.

With a production process with controlled traceability, most of the plastics collected are recycled and transformed into yarns based on responsible processing. The result is a fabric that meets all quality standards.

## Perché utilizzare la fibra di pietra?

Materiale estratto dalla pietra naturale, che conserva diverse proprietà come la durabilità e la conservabilità. La scelta più ecologica per sostituire la plastica.

Diventare ecologici è essenziale per la creazione di una terra sostenibile che richieda meno gas serra, conservazione della natura, nessun inquinamento atmosferico e nessun riscaldamento globale. È possibile con l'uso di prodotti riciclati, utilizzando pratiche di riduzione dei rifiuti che rendono il globo un luogo perfetto in cui vivere nelle nuove generazioni.

## Why using stone fiber?

Material extracted from natural stone, that retains several properties such as durability and preservability. The most eco-friendly choice to replace plastic.

Going green is essential for the creation of a sustainable earth that requires less greenhouse gases, nature conservation and suffers no air pollution or global warming. It is achievable with the use of recycled products, employing waste reduction practices that make the globe a great place to inhabit for the next generation.

# RECYCLED PAPER

# RECYCLED CARDBOARD AND PAPER

## Che cos'è esattamente?

Il riciclaggio della carta riguarda i processi di ri-elaborazione della carta di scarto per il riutilizzo. Le carte di scarto vengono ottenute da cartiera, scarti di carta e materiale di carta di scarto scartato dopo l'uso da parte del consumatore.

## What exactly is it?

Paper recycling pertains to the processes of reprocessing waste paper for reuse. Waste papers are either obtained from paper mill, paper scraps, discarded paper materials, and waste paper material discarded after consumer use.

# FAIR TRADE COTTON BAGS

Fair trade is a global movement made up of a diverse network of producers, companies, consumers, advocates, and organizations putting people and planet first. Fair trade is a way to make a conscious choice for a better world. A choice for Fair Trade Certified™ goods is a choice to support responsible companies, empower farmers, workers, and fishermen and protect the environment.

## REDUCING THE OVERALL EXPOSURE TO TOXIC CHEMICALS

## ORGANIC COTTON

### Che cos'è esattamente?

Il cotone biologico (o cotone naturale) è un altro ottimo tessuto ecologico. È coltivato senza l'uso di pesticidi, erbicidi o altri fertilizzanti chimici ed è semplicemente migliore per la salute e l'ambiente. L'agricoltura biologica (cibo e fibre) protegge la salute delle persone e del pianeta riducendo l'esposizione complessiva a sostanze chimiche tossiche da pesticidi sintetici che possono finire nel terreno, nell'aria, nell'acqua e nelle forniture alimentari e che sono associate a conseguenze sulla salute, dall'asma al cancro. Poiché l'agricoltura biologica non utilizza pesticidi tossici, la scelta dei prodotti biologici è un modo semplice per proteggere l'ambiente e se stessi.

### What exactly is it?

Organic cotton (or natural cotton) is another great eco friendly fabric. It is grown without the use of pesticides, herbicides or other chemical fertilizers, and is simply better for your health and the environment. Organic agriculture (food and fiber) protects the health of people and the planet by reducing the overall exposure to toxic chemicals from synthetic pesticides that can end up in the ground, air, water and food supply, and that are associated with health consequences, from asthma to cancer. Because organic agriculture doesn't use toxic pesticides, choosing organic products is an easy way to help protect the environment and yourself.

## RECYCLED COTTON

PROTECTS THE PEOPLE  
AND THE PLANET

### Che cos'è?

Il cotone riciclato può essere generalmente definito come tessuto di cotone standard convertibile in fibra di cotone che può essere riutilizzato nei prodotti tessili. Il cotone riciclato è anche comunemente chiamato cotone rigenerato. Il cotone riciclato comprende la materia prima riciclata, nonché il cotone usato, ricondizionato e rielaborato.

## SPECIAL PROCESS FOR RECYCLING COTTON

### What is it?

Recycled cotton can be generally defined as converting standard cotton fabric into cotton fiber that can be reused in textile products. Recycled cotton is also commonly referred to as regenerated cotton, reclaimed cotton. Recycled cotton includes recycled raw material, as well as used, reconditioned, and re-manufactured components. There are many benefits in using recycled cotton.
